PROJECTS

To–Do List App   Sep '23

Domain: Web Application | **Language**: JavaScript | **Web**: HTML, CSS

o Developed an intuitive web-based To-Do List application using HTML, CSS, and JavaScript, enabling users to efficiently manage, categorize, complete, and delete tasks with a user-friendly and interactive interface.

   Key features:

o **Effortless Task Management:** Users can easily add, edit, and delete tasks, streamlining their task organization.
o **Category Customization:** Allows users to categorize tasks into different categories or labels, enhancing task organization.
o **Responsive Design:** Ensures the app functions smoothly on various devices and screen sizes.

GitHub Profile App   Jul '23

o **Domain**: Web Application | **Language**: JavaScript | **Web**: HTML, CSS
o Developed a user-friendly web application that allows users to search for any GitHub username and retrieve details about that user.

   Key features:
o Integrated the GitHub API, allowing users to retrieve accurate and up-to-date GitHub user details effortlessly.
o Prioritized data presentation, delivering a clear and organized display of essential user information, including repositories, followers, and contributions.
o Implemented robust error handling.

YouTube Video Analyzer   Apr '23

o **Domain**: Desktop Application | **Programming** Language: Java Swing | Database: MySQL
o Developed a user-friendly desktop application that allows users to retrieve and analyze important metrics of YouTube videos.
   Key features:
o Allows users to access a wide range of video statistics, including views, likes, dislikes, comments, and more.
o Offers a user-friendly interface, making it accessible to users with varying levels of technical expertise.

ACHIEVEMENTS

o 3 stars in java on HackerRank   June '23
o 3 stars in C++ on HackerRank   Apr '23
